

Our Approach

Save Money & Time

We provide engineering and construction services so you don't have to find someone else, and create plans without unnecessary costs and labor.

Site Surveys

We send our experts to your property to inspect the building and quickly create plans based on what your building looks like now, not when it was originally built.

Design-Build

All the engineering and construction work happens under the same roof, which means communication is fast and the entire process is streamlined and efficient.

SGDM's Quick & Easy 5-Step Process

1

Make an appointment with our team

2

Create a structural plan with the engineers

3

Submit structural plans to obtain a permit from DBI

4

Begin construction at the job site with our crew managers

5

Live or work in your new and improved home or store

Over 60%

of the plans we review end up in our re-engineering process, saving our clients more than 23% on average.

Customer Service

Our team works hard to not only finish the job quickly and with accuracy, but also provide excellent customer service to our clients and business partners.

Experienced Team

Coming from a variety of backgrounds in finance, construction, engineering, law, and marketing, our team has everything it takes to complete your project.
